Atsuo Yanagisawa

Support your body while it is still strong.

Japan's mill-and-C line

Atsuo Yanagisawa is a cardiologist and president of the Japanese Society for Orthomolecular Medicine. He edits the Japanese OMNS. In Istanbul he spoke of nutritional strategies when a system is under sudden load. That is Klenner's vein, kept in another language. It is not a bag we sell. It is not JSOM as our brand.

C is a molecule the mill already knows. Oral and vein are still different jobs. Food first. The five are still the day.

A society is not a drip

His layer	Not this page
C taken seriously in a cardiology chair.	A Foundation IV bar.
Japan's living mill-and-C line.	A JSOM chapter we open.
Load as weather after the five.	A biocrisis protocol we print.
Correction remains the how — #52.	A sixth pillar named ascorbate.

What the layer taught

A molecule can cross an ocean and still be the same molecule. The route changes the job. G6PD and a tired kidney stay hard stops for the vein. The gut as weather is next.

How you keep it

Keep Eat. Keep Correction. If a question is a bag in your own arm, take it to someone licensed who knows that vein. Do not stock C because Japan kept a society.

Be brave enough to honor another language without buying the bag

You are not behind if you never read JSOM. You are not too late. Your mills are still minting every second of every day. Feed them. The line is a layer. It is not Tuesday.

The question

Will you honor Japan's mill-and-C line — and still keep Eat as the day? The answer is yours. You can take it. You can leave it. No one can take it for you.

If you take it, eat tonight. That is Yanagisawa, kept as a line — not as a drip.

If you want to keep learning, keep flowing with our Currents. Sabine Hazan is next.

Notes

- This is education. It does not diagnose, treat, or claim to cure. It does not print an intravenous protocol.
- It does not replace your physician, your cardiologist, your medications, or the care you already have.

- If a question is about intravenous ascorbate, take it to a licensed professional who knows that vein. G6PD deficiency and significant kidney insufficiency are hard stops.
- The Foundation does not sell C, bags, or a JSOM membership. Public language stays Metabolic Correction. Istanbul is a calendar fact.
